Melissa can you see the new project?

Can you make me a mapping view of the sampling locations. There should be 3 air monitoring locations that I will need to map.

Also for the sampling locations we should start to see prelim data coming through by Friday. we are going to need to set up an RM analytical page for this.

Mark - Eric is coming to the site tomorrow and will give you the limits that will get loaded into the screening table that we will need to publish up once the data is in and need to set up an RM analytical Page.

Kris next week sometime we will need to put the analytical widget on. I will be on vacation so this is a heads up. Eric will give you the official go.

SCRIBE has been republished with the Datum field in the Location table repurposed to indicate active locations. The two currently active fixed monitoring locations have a Datum value of 'Y'. Every other location has a Datum value of 'N'.
